

Odor Control Products

DESIGNED AND ENGINEERED TO ELIMINATE ODOR PROBLEMS AT YOUR ODORIZATION STATIONS

Activated Carbon Filters

Patented EZ Carb design

Our patented design provides long-term and cost-effective odor removal via adsorption onto a bed of activated carbon. The filter is easy to operate and manipulate.

Filter components and models

Our EZ Carb filters consist of a bed of activated carbon and air distributor, housed in a DOT-approved drum.

The air inlet and outlet are located on top of the drum, allowing for easy handling and transportation.

EZ Carb active filters are equipped with an explosion-proof 1/3 hp blower (200 cfm design flow) which is either mounted on top of the steel drum or detached (connected to the drum by a hose). They are available in two sizes: 30- or 55-gallon drums. The EZ-055A (55-gallon filter with attached blower) weighs approximately 270 lbs.

EZ Carb passive filters are housed in plastic drums (15 gallons) or steel drums (55 gallons).

We also design and install custom-made filtration systems to suit specific client applications.

Carbon cartridge replacement

We propose a cartridge replacement service to eliminate handling of contaminated carbon on your site. The spent carbon is recycled and reused.

We support new as well as existing filters used by gas utility companies.

No odor calls!

Avoid odor calls by removing odorant vapors during:

- Regular operation of the odorizer
- Maintenance
- Odorant refill
- Pressure release
- Equipment failure
- Odorant spills

Odor Control Liquids

Deomer

Deomer is designed to treat odorant contamination of odorizer parts, tools, clothing, metal, concrete, soil, and other surfaces.

Plant-derived active ingredients react with mercaptans to destroy the source of the odor without any harmful reaction byproducts.

Deomer is safe, non-toxic, water-soluble and has a pleasant odor.

We also offer Winter Deomer, with added propylene glycol to prevent freezing.

Deomer is available in a variety of sizes from 16-oz spray bottles to 55-gallon drums.

Masking Agent - Orange

Our masking agent is designed to mask the smell of mercaptan.

It has a fresh orange scent.

It is available in a variety of sizes from 16-oz spray bottles to 55-gallon drums.
